## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1732

#### DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

#### *Election/Restrictions*

2. Applicant's election without traverse of Group I, claims 1-16 in Paper No. 9 is acknowledged.

#### *Specification*

3. The abstract of the disclosure is objected to because in lines 2, 4, 5, 8 and 10, ``comprising'' should be - - including - - (legal or claim-type phraseology should not be used in the abstract). Correction is required. See MPEP § 608.01(b).

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Art Unit: 1732

The following title is suggested: PROCESS OF MAKING POLYMER ARTICLES.

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 4, the line ends with a semi-colon and thus, it is not clear if additional words are missing (a claim must end with a period, at the end of the claim).

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Zachariades (U.S. Patent 4,655,769).

Art Unit: 1732

Zachariades (see the entire document, in particular, the abstract; col. 3, line 22 to col. 11, line 26) teaches a process of making a polymer article as recited in the instant claims, including the aspect of a ``shish kebab'' morphology (i.e., nodes and fibrils).

10. Claims 1, 2 and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Simhambhatla et al (WO 01/45766).

Simhambhatla et al (see the entire document, in particular, page 4, lines 8-10; page 6, line 20 to page 7, line 25; page 8, line 18 to page 9, line 4; page 13, line 24 to page 20, line 17) teach a process of making a polymer article as recited in the instant claims, including the aspect of a ``shish kebab'' morphology (i.e., nodes and fibrils).

#### ***Allowable Subject Matter***

11. Claims 8-16 are allowable over the prior art references presently of record.

12. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art references, alone or in combination, disclose, suggest or teach a process including the steps of extruding a pseudo-gel and annealing to define node and fibril orientation as set forth in instant independent claim 8.

#### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo B.
